EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Page 1, First line---

This is a Non-Provisional of US application number 60/481,340, filed 2003-09-08.

Allowable Subject Matter

Claims 1-3, 5, and 6 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a process for desilicating nonwood plant fibers which includes pre-pulping the fibers with an amount of alkali to bring the pH to within a range of 7 to 11 without dissolving all the silica, followed by filtration or dewatering from the fibers to obtain filtrate with suspended and dissolved silica solids, followed by acidifying the filtrate to precipitate the dissolved silica, followed by removing all silica solids and reusing the filtrate in the pre-pulping step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed August 27, 2007 have been fully considered.

Applicant's arguments and amendment to claim 1 have overcome the rejection of claims 1-3, 5, and 6 under 35 U.S.C. 103(a) over Dorner (US 1,758,655) in view of Rinman (US 1,879,503), set forth previously. It is recognized that Dorner requires an amount of alkali in a pre-treatment liquor necessary to dissolve all the silica to enable subsequent precipitation of lignin by acid addition, therefore does not suggest removing silica from the liquor by the precipitation and mechanical means nor suggest reusing the liquor in the pre-treatment step.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references disclose methods of removing silica in pulping processes.

Myreen (US 6,183,598)

Puttaert (US 1,588,335)

Dreyfus (US 2,560,638)

Roberts (US 4,331,507)

Mulder (US 4,504,356)
